ADC KRONE Features Its Industry-Leading Fibre Solutions At the Asia Pacific FTTH Council Conference

FTTX Leader's Equipment Supports 15 Million Homes Worldwide

Seoul, Korea – 24 May, 2010 – ADC KRONE (NASDAQ: ADCT; www.adckrone.com) will highlight its fiber leadership through its portfolio of OmniReach® fiber-to-the-x (FTTX) solutions at the 5TH Annual FTTH Council Asia Pacific Conference and Exhibition held at the COEX, InterContinental Hotel in Seoul, Korea, May 24-26.

During the conference, ADC KRONE will showcase its OmniReach FTTX connectivity solutions, including the new, low-profile indoor fibre distribution hub (iFDH), passive optical splitter systems, DLX hardened connectors and the MDU Rapid Fibre System. ADC KRONE's Rapid Fibre System is designed specifically to assist carriers when deploying MDU optical fibre distribution networks for a variety of architectures, and to do so in less time and with less total cost on a consistent, high-quality basis for every building.

OmniReach FTTX Solutions are the industry's first infrastructure solutions designed from the ground up to meet the unique requirements of FTTX networks. Designed for operational efficiency and scalability, ADC KRONE's OmniReach solutions simplify FTTX network installation, maintenance, and management from the central office/headend to the outside plant.

"As the need for more bandwidth grows, carriers are being required to upgrade their networks to meet their customers' ever-changing demands to support applications such as IPTV and the use of mobile devices," said YK Loke, Regional Director of ADC KRONE Asia Pacific, and the FTTH Council Asia Pacific President. "With ADC KRONE's solutions portfolio, carriers can migrate to next-generation networks easily and economically. Furthermore, the Asia Pacific market offers great potential for growth and the company looks forward to participating in this expansion."
